

The Avery

1,955 Square Feet

Just Step inside, and it's easy to see why families love the Avery. This appealing ranch design—complete with a spacious kitchen with an eating nook and an optional wrap-around bar that opens into the oversized great room, offers plenty of room for families to gather. And the optional room extensions and volume ceilings throughout lend to the overall feel of the open floor plan. A master bedroom with a private bath and large walk-in closet is located just off the kitchen area, and one to two additional family-sized bedrooms nearby another full bath round out the sleeping quarters. A full basement provides room to grow and play, as well as plenty of storage space, and an attached 2-car garage, optional den and a first floor laundry room make this ranch the perfect choice for your family's active lifestyle.
